## ABOUT THE SAGE METHOD

The SAGE Method is a 7-week Intuitive Development course. It is the most down-to-earth, comprehensive intuitive development program available today.

This online program is proven to cultivate strong psychic awareness and accurate intuition. It combines science and spirituality, pragmatic and esoteric knowledge, to give students the most complete intuitive education available.

The original course was created in a live format back in 2007 from what Isabeau saw was a necessity. Unable to find any intuition development courses that were thorough, she created her own, making sure to include not only intuitive exercises but intense focus on removing the blocks people have to its development. The course begins with removing that which is blocking the student. It then provides understanding and knowledge as to how intuition works. And it wraps up with intuitive experiments and exercises that show the student what their unique intuition is capable of.

The SAGE Method course was brought to the online marketplace and has exploded in popularity. Students are now able to access these teachings from anywhere in the world and at any time. Throughout the seven weeks, students undergo a journey of emotional, mental and spiritual transformation—a journey that can be life changing.

By attending the course, students:

- Perfect the skills required to have more psychic/intuitive experiences: Learn how to manage, harness and call psychic experiences on demand.
- Get in right relationships with their environment, and with the people around them: Transform their state of mind, gain freedom from repeating patterns, and turn their relationships into thriving, healthy parts of their life.
- Learn how to connect and listen to their intuition: Use their intuition as their guide to improve the health, wealth and happiness of themselves and those around them.
- Discover a community of like-minded individuals: Find their spiritual community and get their soul nourished with a group of people who see and accept them exactly as they are.
- Regain balance in their life: Learn how to live in their most natural, easeful flow and develop the courage to make the changes required for their highest good.
